

EDF eCurrent— It's easy being green.

Interested in going green, but not ready for a long term offtake? We have options to meet any and all of your needs. **eCurrent** from EDF Energy Services and EDF Renewable Energy is a collection of product options that allow you to participate in the green energy space.

Customized green energy solutions.

From dedicated energy from a local wind facility to a small investment in a renewable asset, **eCurrent** offers green options to achieve your sustainability, fiscal, and renewable supply objectives at your preferred level.

Why eCurrent?

SIMPLE:

- Easy way to participate in renewable energy markets.
- All terms embedded in one retail contract with one supplier, EDFES.

SPECIFIC:

- Your wind energy product will be sourced from a dedicated local wind farm.
- Volume size customized to your company's needs.

FLEXIBLE:

- Short-term and flexible structures.
- Options to increase participation at any time.

Easy as 1-2-3.

We offer three levels of participation within the **eCurrent** product family:

eCurrent GUSTO

Green up your energy by purchasing RECs.

eCurrent BLAST

Dedicated wind energy delivered to your location from available wind facilities.

EASY eCurrent

A portion of your electricity spend will support current environmental electricity generation sites.
